Internet

FOMS Wireless:

ESSID: foms

WEP: 0x123456789abcdef123456789ab

USE SENSIBLY - Bandwidth costs us money

Open Wireless - avoid use

Trouble? Ask John :-)

***Building a viable future of open
media technology***

Some Actions of FOMS 2007

- Promote the usage of patent unencumbered codecs such as dirac/theora and vorbis.
- Get the liboggplay library in good shape for native browser plugin deployment.
- Get oggplay into the base firefox 3.0 install.
- Get community feedback on pulseAudio development to insure that it works for the majority of applications and user needs.
- Propose GStreamer to people who want a common high level codec API.
- Design a new standard Audio I/O API and find a good name.

Thursday Program

9:00-9:30 Welcome
