

Xiph.org: Activity

- Project aim:
 - Provide royalty-free Media technology
 - Internet-safe A/V formats
- Features:
 - Ogg, Vorbis, Theora, Speex, FLAC
 - Umbrella project

Xiph.org: Challenges

- Adoption of free formats
- Getting people to care
- Playback support
- Tool integration

Xiph.org: Dependencies

- Libraries in use:
 - Try not to depend on anything ourselves
 - And internal stack has evolved: libfishsound, liboggplay, libogg, codec libraries
- Projects that depend on us:
 - Gstreamer framework, Various media players
 - Opera and Firefox?

Xiph.org: Next Steps

- Work on application support directly from within our group.
- Continue to develop reference implementations.
- New codec research.
